💰 Student Investment Simulator

Field Project – Financial Planning

Presented by: Megh Shah
Course: B.Tech

Made with GAMMA

📌 Field Problem Identified

Problem Observed

- Students lack practical exposure to stock market investing
- Most learning is theoretical
- Fear of financial loss prevents real participation

🎯 Project Aim

To develop a virtual investment platform for practical learning without financial risk.

Made with GAMMA

🔷 Project Implementation

System Features

- Virtual capital of ₹1,00,000
- Buy/Sell stocks (mock data)
- Portfolio management
- Profit & Loss tracking

Financial Concepts Applied

- Asset Allocation
- Diversification
- Risk Awareness
- Portfolio Analysis

Made with GAMMA

📊 Output & Impact

Visible Output

- Portfolio dashboard
- Asset allocation pie chart
- Profit/Loss growth graph
- Leaderboard (optional multi-user mode)

📈 Expected Impact

- Improves financial literacy
- Builds decision-making skills
- Encourages smart investing habits

Made with GAMMA

🟦 Conclusion

- Practical implementation of financial planning concepts
- Safe environment for investment learning
- Useful tool for students and beginners

🙏 Thank You
